PROFILE

Technology Product Manager with 6+ years of experience delivering complex data-driven, ML-enabled and platform products at leading technology companies including Alibaba and Meituan. Experienced in owning products from strategy and requirements definition through cross-functional delivery, launch and continuous optimisation across consumer and enterprise environments. Has delivered products serving 100M+ consumers and 1,000+ enterprise clients, combining two master's degrees across engineering and business with strong data-driven product judgement.

CORE EXPERTISE

Data Product Development | Requirements Analysis | Product Lifecycle Management | Platform Product Strategy & Roadmap Planning | B2B Product Commercialisation | Product, Operations & Technology Collaboration | Cross-functional Stakeholder Management | 0-to-1 Product Launch & Go-to-Market

PROFESSIONAL EXPERIENCE

Senior Product Manager

Sep 2023 - Mar 2024

Beijing SanKuai Network Tech. Co. Ltd (Meituan), Beijing, China

- Owned product strategy and roadmap for drone positioning system, partnering with engineering teams to improve positioning accuracy and anomaly handling, reducing delivery failures by 11% (historical replay).
- Defined operational rules and decision logic (autonomous flight, manual takeover) for abnormal drone-delivery scenarios, rolled out with operations and dispatch, reducing overdue deliveries by 15% (replay analysis).
- Made manual takeover reversible by defining navigation health states and a recovery gate, cutting handling time per device by 16.8% and increasing operator capacity as the network expanded.

Senior Product Manager

May 2022 - Aug 2023

Beijing Langge Technology Co. Ltd, Beijing, China

- Led product strategy for lane-level positioning and navigation, translating large-scale vehicle trajectory and driving-behaviour analysis into real-time prediction logic, adopted in two production vehicle models.
- Drove B2B productisation of location-data capabilities into solutions for retail site selection and traffic planning, partnering with sales and engineering to reach 100+ commercial and public-sector clients.
- Led the cross-functional integration of vehicle navigation and recommendation products, launching nearby, en-route and food-and-entertainment recommendations and contributing to revenue growth of more than 2.4%.

Product Manager

Sep 2021 - May 2022

Dajia Internet Information Tech Co. Ltd (Kuaishou), Beijing, China

- Segmented users and upgraded personalised recommendation strategies through content-consumption and conversion-funnel analysis, increasing user retention by 0.8% and e-commerce transaction rate by 1.7%.
- Partnered with UX to shorten checkout flows, reducing checkout abandonment by 0.72%.
- Introduced post-purchase personalised recommendations to re-engage high-intent users, increasing subsequent purchase conversion by 2.3%.

Product Manager

Apr 2020 - Sep 2021

Alibaba Group Holding Limited, Beijing, China

- Spearheaded a 0-to-1 real-time event publishing platform from concept to go-to-market launch, coordinating 6 cross-functional teams (engineering, data, operations, sales, legal, finance), generating ¥6M+ in initial revenue.
- Initiated and led the replacement of a hand-written rule system with a learned model for complex-junction guidance, defining the labelling policy and mapping model confidence onto tiered in-car guidance; cut motorway detours by 28% in A/B testing across 15+ cities.

- Evolved positioning from generic rules to scenario-aware, ML-driven decision-making by defining complex navigation contexts, mining large-scale scenario data, and deploying real-time detection and strategy activation across metro, indoor, elevated-road and ride-hailing journeys.

Junior Product Manager

Mar 2018 - Apr 2020

Alibaba Group Holding Limited, Beijing, China

- Built an end-to-end quality framework covering customer-facing service quality, feature impact and server health, enabling real-time monitoring and evaluation; reduced incident response time from one day to one hour.
- Translated diverse enterprise requirements (spanning precision, request frequency, traffic scale and reliability) into differentiated API/SDK service tiers, balancing performance and infrastructure efficiency for 100M+ consumers and 1,000+ enterprise clients.

EDUCATION

MSc Sustainable Supply Chain Management | GPA:3.42/4.20

2025 – Aug 2026

UCD Michael Smurfit Graduate Business School | Dublin, Ireland

MSc Aeronautical and Astronautical Science

2015 – 2018

Beijing Institute of Technology | Beijing, China

Bachelor of Vehicle Engineering

2010 – 2014

Shandong University of Technology | Zibo, China

ADDITIONAL INFORMATION

- Work Authorisation: No employer sponsorship required
- Tools: SQL | Power BI | Excel | Axure | A/B testing
- Awards: UCD Advantage Award (2026), UCD Badminton Mixed Doubles Silver Medal
- Languages: English (Fluent), Chinese (Native)
- Interests: Hiking, Badminton, Scuba Diving
